RE: Results of QA inspection in ROG plant

In a routine QA inspection that was performed in ROG plant, it was found that there is a concern regarding Listeria bacteria in 3 items with certain expiration dates:

Klik Ugi cereal with chocolate flavored crumbs coated with milk chocolate – expiration date: July 8 – July 15, 2015.

Klik XL extra fine milk chocolate with cereal crisps and cookies – expiration date: July 16 – July 18, 2015.

Klik In Nougat, crispy bar filled with nougat coated with milk and white chocolate – expiration date: March 31 – April 3, 2015.

We checked and found that none of these items were produced or exported to Paskesz Candy Company.

Best regards,

Gabi Preisach
Export manager
